The heart of your pantry.

Mazola® Corn Oil can help lower cholesterol 2x
more than extra virgin olive oil.*

To discover more, visit mazola.com

*Maki K, Lawless A, Kelley K, Kaden V, Geiger C, Dicklin M. Corn oil improves the plasma lipoprotein lipid profile compared with extra-virgin olive oil consumption in men and women with elevated cholesterol: results from a randomized feeding trial. J Clin Lipidol. Article in press. Accessed December 10, 2014. Study sponsored in part by ACH Food Companies, Inc. *Very limited and preliminary scientific evidence suggests that eating about 1 tbsp (16 grams) of corn oil daily may reduce the risk of heart disease due to the unsaturated fat content in corn oil. FDA concludes there is little scientific evidence supporting this claim. To achieve this possible benefit, corn oil is to replace a similar amount of saturated fat and not increase the total number of calories you eat in a day. See product pages for more information about corn, canola, vegetable plus, corn plus, and olive oils *Corn oil is a cholesterol-free food that contains 14g of total fat per serving. See nutritional information on label or at Mazola.com for fat and saturated fat content.

**Make it
with heart.**
